Los Angeles, CA, 90024   Millbrae, CA, 94030
(310)-825-2275   (650)-200-9488

EDUCATION

Current   High School
University of California, Los Angeles   Mills High School
Major: Computer Science and Engineering   Graduation Date: May 26, 2016
Expected Graduation: July, 2020   GPA: 4.18 weighted, 3.98
unweighted

CURRENT COURSES

- CS31: Intro to Computer Science in C++
- Math 31B: Integration and Infinite Series
- CS1: Computer Science Seminar
- GE: Astrobiology

RELEVANT EXPERIENCE

Internship
Socos Labs, LLC
June 27th - August 27th
Data Science Intern working with Vivienne Ming
- Used Python to conduct elementary data science
- Made scraping scripts to scrape various websites for data of demographics and statistics.
- Used preliminary machine learning tactics such as SciKit Learn to make linear regression graphs to find patterns out of data.
- Conducted surveying and contributed to an article detailing our results

HP CodeWars
March 5th, 2016
- Used Java to solve various problems set to us
- Gained valuable experience in thinking with rapid coding and on the spot solutions

PROFESSIONAL EXPERIENCE

Summer Day Camp:
Each summer from June-August, 2011-2016
Main Counselor
- Basic duty as a counselor was to watch over children throughout camp.
- As main counselor, managed budgets for activities, kept time to keep groups up with their schedules
- Oversaw other counselors to make sure they completed their tasks and kept their behavior in line and made sure they put the children's priorities first.
- Job required communication to speak out my ideas and leadership skills to command the respect of other counselors, while doing the same to others.

SKILLS

- Knows Java and Python, learning C++, can pick up languages fairly quickly (learned Python in 2 weeks)
- Highly efficient, good time management, decisive, communicates effectively
- Keeps a high, positive attitude, tends to joke around a lot
- Self-taught HTML, CSS, and Javascript.
